

7th Grade Math Vocabulary Week 1

Across

- 1 A letter that is used to represent an unknown number.
- 3 $a+b = b+a$; $ab = ba$
- 4 An operation that "undoes" another operation.
- 7 $a(b+c) = ab + ac$
- 10 In the expression b to the x , x is called this.
- 11 The multiplicative inverse of an expression.

Down

- 2 $(a+b) + c = a + (b+c)$; $(ab)c = a(bc)$
- 5 Terms that contain exactly the same variables.
- 6 Find the value of an expression by substituting actual values for variables.
- 8 The order of operations.
- 9 A collection of numbers, variables, and symbols that represents a quantity.

Possible Answers:

associative property, commutative property, distributive property, evaluate, exponent, expression, inverse, like terms, PEMDAS, reciprocal, variable
