

## 7th Grade Math Vocabulary Week 14

### Across

- 1 The slope of a line.
- 4 The rate of motion measured in distance and its relation to time.
- 6 A comparison of two measurements in which the second term has a value of 1.
- 7 A comparison of two quantities that have the same unite of measure.
- 8 A graph that displays data by using points joined by line segments.

### Down

- 2 A method of measuring intervals.
- 3 An equation that relates at least two variables. Usually used for finding the value of one variable when the other values are known.
- 4 The incline on a line.
- 5 A measurement of the space between two points. This measurement is always a positive number.

### Possible Answers:

distance, formula, ratio, slope, speed, steepness, straight line graph, time, unit rate
