

7th Grade Math Vocabulary 24

Across

- 3 Points, lines, or figures that lie in the same plane.
- 5 Lines that cross or meet.
- 8 Having angles and sides in the same relative place.

Down

- 1 Exactly the same size and shape.
- 2 Lines that are not parallel and don't intersect on 3-D figures
- 4 Two lines that intersect and form a right angle (90 degrees).
- 5 The shape obtained from a reflection.
- 6 The amount of space inside a 3-D figure measured in cubic units.
- 7 Shapes whose corresponding angles are equal and their corresponding sides are in proportion.
- 9 3-D figures along with the volume that it encloses.

Possible Answers:

congruent, coplanar, corresponding, image, intersecting lines, perpendicular, similar, skew lines, solid, volume
