Name: _____

Date: _____

7th Grade Common Core Math Vocabulary 15

Across

1 New amount is less than the original amount. It is a ratio of the amount of decrease to the original amount.

4 A sample that is selected from the population in such a way that every member of the population has the same chance of being selected.

7 Original amount of money originally invested.

10 Angle whose measure is equal to 90°.

11 Equation that states that two ratios are equal.

13 Data from part of a population.

14 Distance from the center of a circle to a point on the circle.

15 In statistics it is a characteristic used to describe a population.

Down

1 Measure of the likelihood that an event will occur.

2 In data sets, maximum minus minimum.

3 Decimal in which a digit or a group of digits repeats without end.

4 Comparison of two quantities that uses division.

5 New amount is greater than the original amount. It is a ratio of the amount of increase to the original amount.

6 Entire set of items from which data can be selected.

7 Polyhedron formed by connecting one polygonal face to several triangular faces; they are classified by their bases.

8 Ratio of the circumference of a circle to its diameter.

9 List of all possible outcomes of an experiment.

12 Ratio that compares two quantities that are measured in different units.

Possible Answers:

parameter, percent decrease, percent increase, pi, population, principal, probability, proportion, pyramid, radius, random sample, range, rate, ratio, repeating decimal, right angle, sample, sample space
