Name: _____

Date: _____

7th Grade Common Core Math Vocabulary 5

Across

3 Collection of points on the same plane equidistant from the same point.

8 An angle whose measure is greater than 0° but less than 90°.

12 Used for repeating decimals. A bar is drawn over digits that repeat.

13 Number that is multiplied by a variable in an algebraic expression.

15 Sum of their angle measures is equal to 90°.

16 Amount of money a salesperson earns after selling a product.

Down

1 Ratio between two values is always the same, or constant.

2 Two angles that share a common vertex and a common side.

3 Refers to the outside of a circle.

4 Angles that have the same relative positions in geometric figures.

5 A number or an algebraic expression that is a factor of two or more numbers of algebraic expressions.

6 Mathematical phrase involving at least one variable and sometimes numbers and operation symbols.

7 Single polygonal face.

9 Simplify expressions by adding or subtracting like terms.

10 Formed by the intersection of a plane and a solid when a plane passes through the solid.

11 Two or more angles that have equal measures.

13 Collection of data from every member of a population.

14 Change it to an equivalent measurement in different units.

Possible Answers:

acute angle, adjacent angles, algebraic expression, bar notation, base of pyramid, census, circle, circumference of circle, coefficient, combine like terms, commission, common factor, complementary angles, congruent angles, constant of proportionality, convert, corresponding angles, cross section
