

# 7th Grade Math Vocabulary Week 4

**Across**

- 2 The numbers 0, 1, 2, 3, 4.....
- 4 A number that is not a whole number. It represents a part of the whole.
- 5 A sequence that does not continue forever.
- 6 The distance of a number from zero on the number line. It is always a positive number.
- 7 A number that can be written as a fraction in which the numerator and denominator are both integers (denominator can't = zero).
- 9 Examining two things to discover similarities and differences between them.
- 10 The amount by which one quantity is greater or smaller than another quantity.
- 11 A number including a decimal point.

**Down**

- 1 A measurement of the space between two points.
- 2 Any real number that cannot be expressed as a fraction.
- 3 A sequence that continues forever.
- 8 Numbers that are the same distance from 0, but going in opposite directions. ex. 5 and -5

**Possible Answers:**

absolute value, comparison, decimal, difference, distance, fraction, integer, irrational number, opposite, rational number, repeating, terminating
