

1st Grade Science Vocabulary Crosswords 2

Across

- 2 The act or process of changing position and/or direction.
- 4 The progeny or descendants of an animal or plant considered as a group.
- 5 Something, such as a forest, a mineral deposit, or fresh water, that is found in nature and is necessary or useful to humans.
- 9 What one has observed using senses or instruments.
- 10 Any of the faculties by which stimuli from outside or inside the body are received and felt, as the faculties of hearing, sight, smell, touch, taste, and equilibrium.
- 12 The closest star to Earth and the center of our solar system.
- 13 A process that uses science process skills as tools to gather, organize, analyze, and communicate information.

Down

- 1 The sexual or asexual process by which organisms generate new individuals of the same kind and perpetuate the species.
- 2 The galaxy of which the sun and the solar system are a part and which contains the myriads of stars that create the light of the Milky Way.
- 3 An organism, usually a plant or bacterium, that produces organic compounds from simple inorganic molecules and energy (typically light energy) from the environment.
- 6 An individual form of life of one or more cells that maintains various vital processes necessary for life.
- 7 A star and all the planets and other bodies that orbit it; the region in space where these bodies move.
- 8 The force with which a body is attracted to Earth or another celestial body, equal to the product of the object's mass and the acceleration of gravity.
- 11 The limitless expanse where all objects and events occur.

Possible Answers:

Milky Way Galaxy, motion, natural resource, observation, offspring, organism, producer, reproduction, Scientific Method, sense, solar system, space, sun, weight
