

# 2nd Grade Science Vocabulary Crosswords 2

**Across**

- 1 The progeny or descendants of an animal or plant considered as a group.
- 4 In meteorology, a form of water, such as rain, snow, or sleet that condenses from the atmosphere, becomes too heavy to remain suspended, and falls to the Earth's surface.
- 5 The tendency of particles or bodies of the same electric charge or magnetic polarity to separate.
- 9 The rate at which work is done, expressed as the amount of work per unit time and commonly measured in units such as the watt and horsepower.
- 10 A person with expert knowledge of one or more sciences, that engages in processes to acquire and communicate knowledge.
- 12 An individual form of life of one or more cells that maintains various vital processes necessary for life.
- 13 The closest star to Earth and the center of our solar system.
- 14 An organism, usually a plant or bacterium, that produces organic compounds from simple inorganic molecules and energy (typically light energy) from the environment.
- 15 One of four natural divisions of the year—spring, summer, autumn, and winter - in temperate zones.
- 17 The sexual or asexual process by which organisms generate new individuals of the same kind and perpetuate the species.

**Down**

- 2 The limitless expanse where all objects and events occur. Outer space is the region of the universe beyond Earth's atmosphere.
- 3 The force with which a body is attracted to Earth or another celestial body, equal to the product of the object's mass and the acceleration of gravity.
- 6 A process that uses science process skills as tools to gather, organize, analyze, and communicate information.
- 7 Something, such as a forest, a mineral deposit, or fresh water, that is found in nature and is necessary or useful to humans.
- 8 A measure of the amount of space an object takes up; also the loudness of a sound or signal.
- 10 The internal structure of vertebrate animals, composed of bone or cartilage, that supports the body, serves as a framework for the attachment of muscles, and protects the vital organs and associated structures.
- 11 Any of the faculties by which stimuli from outside or inside the body are received and felt, as the faculties of hearing, sight, smell, touch, taste, and equilibrium.
- 12 What one has observed using senses or instruments.
- 16 Having a definite shape and a definite volume; one of the fundamental states of matter.

**Possible Answers:**

natural resource, observation, offspring, organism, power, precipitation, producer, reproduction, repulsion, Scientific Method, scientist, season, sense, skeleton, solid, space, sun, volume, weight
