

Geometry Vocabulary Crossword Puzzle

Across

- 1 A pair of lines that cross or will eventually cross.
- 3 A pair of intersecting lines that cross at a 90 degree right angle.
- 4 An angle that measures exactly 90 degrees.
- 5 A quadrilateral with 2 pairs of parallel lines, 4 equal length sides.
- 8 A triangle with 3 acute angles.
- 11 A closed figure with three or more straight sides.
- 14 A quadrilateral with one set of parallel lines.
- 17 Points that mark the ends of a line segment or end of a ray.
- 19 A quadrilateral with 2 pairs of parallel lines, 4 equal length sides, 4 right angles (a "special" type of rectangle).
- 21 A three sided polygon.
- 22 A figure made up of points that extend forever in both directions.
- 23 Point where two rays meet to create an angle.
- 24 A fixed location in space.
- 25 An angle that measures between 0-90 degrees.
- 26 A quadrilateral with 2 pairs of parallel sides and 4 right angles.

Down

- 2 A triangle that has three equal length sides.
- 3 A pair of lines that are the same distance apart and will never cross or intersect.
- 6 A triangle that has no equal length sides
- 7 Two rays share an endpoint and extend forever in different directions.
- 9 A figure that has one endpoint and extends forever in the other direction.
- 10 A 4-sided polygon.
- 12 A triangle with one obtuse angle.
- 13 A triangle that has AT LEAST two equal length sides.
- 15 A quadrilateral with two sets of parallel lines.
- 16 A triangle with one right angle.
- 18 An angle that measures exactly 180 degrees.
- 20 An angle that measures between 90 and 180 degrees.

Possible Answers:

acute angle, acute triangle, angle, endpoints, equilateral triangle, intersecting lines, isosceles triangle, line, obtuse angle, obtuse triangle, parallel lines, parallelogram, perpendicular lines, point, polygon, quadrilateral, ray, rectangle, rhombus, right angle, right triangle, scalene triangle, square, straight angle, trapezoid, triangle, vertex
