Find all words below. Words can be found across, up and down, and diagonally.

- | | | |
|--|----------------------|----------------------------------|
| acute triangle | algebraic expression | commutative property of addition |
| commutative property of multiplication | dependent variable | equilateral triangle |
| expression | factor | maximum |
| multiplicative identity | number line | obtuse triangle |
| property of 1 | polygon | quotient |
| ordered pair | right triangle | similarity |
| right rectangular prism | square-based pyramid | surface area |
| square unit | upper extreme | vertex |
| triangular pyramid | | |
